Office Action Summary

Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 10 are, drawn to a product, classified in class 428, subclass 172.
 - II. Claim 9, drawn to a product, classified in class 428, subclass 192.

2. The inventions are distinct, each from the other because:

Groups I and II are separate and distinct inventions which do not require the particulars of each other. Group II has a wedge-shaped edge towards a central volume part of the adhesion surface without a shoulder while Group I has a shoulder and a wedge-shaped edge with the periphery of said adhesion surface, said wedge-shaped edge oriented to face away from the adhesion surface and to oppose said shoulder.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1772

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication should be directed to D. Loney at telephone number 703-308-2416.
